Abhishek Kumar

Gurugram, Haryana
9170437299 abhishek002kvs@gmail.com Abhishek github.com/abhishek1711mmmut

Skills

Languages: C/C++, Java, Python, JavaScript, TypeScript, SQL
Frameworks/Libraries: Spring, Spring Boot, ReactJS, NextJS, NodeJS, ExpressJS, Flask
Developer Tools: Docker, AWS, EC2, S3, Selenium, IntelliJ, Postman, Eclipse

Experience

Accenture Solutions Pvt Ltd **Sept 2024 – Present**
Associate Software Engineer *Gurugram, Haryana*

- Improved Java application performance by implementing caching strategies, optimizing database queries, and reducing garbage collection overhead.
- Utilized Jenkins to automate CI/CD pipelines and GitHub for continuous integration and deployment while implementing **JUnit testing**, which reduced errors by 40%, improving code reliability and maintainability.
- Implemented DevSecOps principles, performed vulnerability assessments, and deployed secure AWS solutions, optimizing costs by identifying and removing unused AWS resources.
- Technology Used : **Java, Spring Boot, JUnit, MySQL, Maven, Tomcat**

Purezza Technologies **Dec 2023 – Aug 2024**
MERN Stack Developer Intern *Ahmedabad, Gujarat*

- Worked on developing scalable, high-performance, and responsive web applications using the MERN stack, optimizing load times and enhancing overall user experience.
- Led 5+ successful web applications, directly managing client communication and ensuring requirement fulfillment.
- Assisted fellow developers in debugging their code on various projects, contributing to a 25% reduction in development time and enhancing team productivity.
- Technology Used : **NextJS, ReactJS, Redux, ExpressJS, MongoDB, NodeJS**

Projects

Smart Contact Manager | *Source Code , Live Link* **Feb 2025**

- Developed a Java-based contact management system allowing users to efficiently manage contacts, utilizing Spring Data JPA for database interactions, **RESTful APIs** for data handling, and Spring Security for secure user access.
- Implemented **Thymeleaf** for dynamic templating and **Lombok** to reduce boilerplate code by approximately 30% which resulted in a more concise and faster development.
- Built a multi-tier architecture, featuring a robust Data Layer with Data Access Objects (DAO) for seamless database operations and Data Transfer Objects (DTO) for effective data transfer to the Business Layer.
- Technology Used : **Java, Spring Boot, MySQL, Thymeleaf, Lombok**

StudyNotion | *Source Code , Live Link* **Sept 2023**

- Developed a full-stack EdTech platform enabling instructors to create and deliver courses, while students enroll and learn, connecting instructors and students and enhancing accessibility to quality education.
- Implemented **MVC** architecture in a MERN stack application, integrating **Cloudinary**, **bcrypt** & **JWT**, and React Redux for media, authentication, and state management, ensuring a scalable and maintainable codebase.
- Resolved authentication persistence issues by implementing local storage for user session management, improving login reliability and user experience.
- Technology Used : **ReactJS, Redux, ExpressJS, MongoDB, NodeJS**

Education

Madan Mohan Malaviya University of Technology **Oct 2020 – June 2024**
Bachelor of Technology in Electronics and Communication Engineering *Gorakhpur, Uttar Pradesh*

Awards and Certificates

- Ranked AIR **46 out of 30k+** participants in CodeKaze - June'23 Round 2 by Coding Ninjas
- Achieved a Global Rank of **1465 out of 24k+** participants in CodeChef Starter 78.
- Qualified for the semi-final round of the Coding Contest at Code Gladiators 2023.
